Introduction to the 2014-2015 Report

At the University of the Pacific, we are committed to providing a high-quality education for all students. We are also committed to being a responsible member of the community. This report provides an overview of our activities and achievements over the past year.

Implementing the Standards for Mathematical Practices

The Standards for Mathematical Practices (SMPs) are a set of eight practices that describe the behaviors and habits of mind that all students should develop and use to become mathematically proficient. These practices are the foundation of mathematical proficiency and are essential for students to be able to apply their mathematical knowledge and skills to solve problems and make sense of the world around them.

The SMPs are: 1. Make sense of problems and persevere in solving them. 2. Reason abstractly and quantitatively. 3. Construct viable arguments and critique the reasoning of others. 4. Model with mathematics. 5. Use appropriate tools strategically. 6. Attend to precision. 7. Look for and make use of structure. 8. Look for and express regularity in repeated reasoning.

How to Use the Standards for Mathematical Practices

The Standards for Mathematical Practices are designed to be used in a variety of ways. They can be used to guide instruction, to assess student understanding, and to provide a framework for student learning. The following are some ways to use the SMPs:

Instruction: The SMPs can be used to guide instruction by providing a framework for what students should be able to do and understand. Teachers can use the SMPs to design lessons and activities that focus on developing these practices.

Assessing Student Understanding of the Standards for Mathematical Practices

Assessing student understanding of the Standards for Mathematical Practices is a challenge because these practices are often embedded in mathematical tasks and are not always explicitly taught. However, there are several ways to assess student understanding of the SMPs:

Observation: Teachers can observe students as they work on mathematical tasks and look for evidence of the SMPs. This can be done through direct observation or through student self-reflection.

How do we know if a child is ready to read?

THE 5-STAR READING TEST

How do we know if a child is ready to read?

How do we know if a child is ready to read? The 5-Star Reading Test is a simple, easy-to-use tool that helps parents and teachers determine if a child is ready to read.

THE 5-STAR READING TEST
The 5-Star Reading Test is a simple, easy-to-use tool that helps parents and teachers determine if a child is ready to read. It consists of five questions that are answered by the child and the teacher. The questions are designed to assess the child's understanding of the alphabet, the ability to recognize and name letters, and the ability to understand the meaning of words.
