

This document provides a detailed overview of the system architecture and its components.

| Component     | Function                   | Configuration | Dependencies | Notes           |
|---------------|----------------------------|---------------|--------------|-----------------|
| Client        | Client application         | 1.0.0         | None         | Initial version |
| Server        | Server application         | 1.0.0         | Client       | Initial version |
| Database      | Database application       | 1.0.0         | Server       | Initial version |
| API           | API application            | 1.0.0         | Server       | Initial version |
| UI            | UI application             | 1.0.0         | Client       | Initial version |
| Auth          | Authentication application | 1.0.0         | Server       | Initial version |
| Logging       | Logging application        | 1.0.0         | Server       | Initial version |
| Monitoring    | Monitoring application     | 1.0.0         | Server       | Initial version |
| Deployment    | Deployment application     | 1.0.0         | Server       | Initial version |
| Testing       | Testing application        | 1.0.0         | Server       | Initial version |
| Documentation | Documentation application  | 1.0.0         | Server       | Initial version |
