1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the participants.

The study was conducted in a laboratory setting with 20 participants. The participants were divided into two groups: the control group and the experimental group.

Participant	Control Group	Experimental Group	Results
1	1.2	1.5	0.3
2	1.1	1.4	0.3
3	1.3	1.6	0.3
4	1.0	1.3	0.3
5	1.4	1.7	0.3
6	1.1	1.4	0.3
7	1.2	1.5	0.3
8	1.3	1.6	0.3
9	1.0	1.3	0.3
10	1.4	1.7	0.3
11	1.1	1.4	0.3
12	1.2	1.5	0.3
13	1.3	1.6	0.3
14	1.0	1.3	0.3
15	1.4	1.7	0.3
16	1.1	1.4	0.3
17	1.2	1.5	0.3
18	1.3	1.6	0.3
19	1.0	1.3	0.3
20	1.4	1.7	0.3

The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that are needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves carrying out the actions that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves assessing the effectiveness of the actions that have been taken and determining whether the problem has been resolved.

The second step in the process of identifying a problem is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that are needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves carrying out the actions that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves assessing the effectiveness of the actions that have been taken and determining whether the problem has been resolved.

1. The following information was obtained from the records of the Department of Health and Human Services, Office of the Assistant Secretary for Health, regarding the number of deaths from heart disease in the United States in 1998:

Age Group	Number of Deaths
15-24	1,000
25-34	2,000
35-44	3,000
45-54	4,000
55-64	5,000
65-74	6,000
75-84	7,000
85+	8,000

Age Group	Number of Deaths
15-24	1,000
25-34	2,000
35-44	3,000
45-54	4,000
55-64	5,000
65-74	6,000
75-84	7,000
85+	8,000

2. The following information was obtained from the records of the Department of Health and Human Services, Office of the Assistant Secretary for Health, regarding the number of deaths from heart disease in the United States in 1998:

Age Group	Number of Deaths
15-24	1,000
25-34	2,000
35-44	3,000
45-54	4,000
55-64	5,000
65-74	6,000
75-84	7,000
85+	8,000

3. The following information was obtained from the records of the Department of Health and Human Services, Office of the Assistant Secretary for Health, regarding the number of deaths from heart disease in the United States in 1998:

Let's assume that the company's management is considering a new project that will require an initial investment of \$100,000. The project is expected to generate cash flows of \$30,000 per year for the next 5 years. The company's cost of capital is 10%. The project's NPV is calculated as follows:

Year	Initial Investment	Yearly Cash Flow	Present Value of Cash Flow
0	\$100,000		
1		\$30,000	\$27,273
2		\$30,000	\$24,793
3		\$30,000	\$22,539
4		\$30,000	\$20,490
5		\$30,000	\$18,627

The NPV of the project is \$10,722, which is positive, indicating that the project is profitable.

Year	Initial Investment	Yearly Cash Flow	Present Value of Cash Flow
0	\$100,000		
1		\$30,000	\$27,273
2		\$30,000	\$24,793
3		\$30,000	\$22,539
4		\$30,000	\$20,490
5		\$30,000	\$18,627
